

SİMAY KİMYA LTD.ŞTİ

PLASCOL C 90

Features:

Appearance:	White powder
Kind of product:	compound of special synthetics, copolymers and modifeid starch
Moisture (at 105 °C):	10 – 12 %
pH value (10% conc.):	6,5 - 8,5
Viscosity (10%conc., at 85 °C):	250 - 450 Pa.s, 30 rpm, 1. sp, Soif NDJ-8S or 39 - 49 seconds, ford cup 4

Preparation of The Solution

The required quantity of product is added to cold water. Under stirring the slurry should be heated up till 95 °C and kept for at least 20 minutes at this temperature.

Desizing Washed out quickly withH enzymes.

Properties

- Excellent sizing effect
- Transparent and flexible films
- Compatible with other sizing agent
- Good biological degradability

Storage Products in their original bags, moisture-free, has a lifetime of 2 years in a dry and well ventilated storage conditions.

Special Note The data contained in this safety information and advice should be observed when using the product.
