## PLASCOL M 5

### Features:

|  |   |
|--|---|
| <b>Appearance:</b>                     | White powder  |
| <b>Kind of product:</b>                | potato based modified starch  |
| <b>Moisture (at 105 °C):</b>           | 10 - 12%  |
| <b>pH value (10% conc.):</b>           | 6,5 - 8,5   |
| <b>Viscosity (10%conc., at 85 °C):</b> | 60 – 200 cps Pa.s, 30 rpm, 1. sp, Soif NDJ-8S or<br>17 - 24 seconds, ford cup 4 |

### Preparation of The Solution

The required quantity of product is added to cold water. Under stirring the slurry should be heated up till 95 °C and kept for at least 20 minutes at this temperature.

**Desizing** Washed out quickly with enzymes.

### Properties

- Excellent sizing effect
- Transparent and flexible films
- Compatible with other sizing agent
- Good biological degradability

**Storage** Products in their original bags, moisture-free, has a lifetime of 2 years in a dry and well ventilated storage conditions.

**Special Note** The data contained in this safety information and advice should be observed when using the product.
